

What is claimed is:

- Sub
A1
1. A slide ring seal assembly comprising
 - (a) a slide ring having an axially extending annular leg; said leg having radially outer and radially inner circumferential surfaces and a free axial end;
 - (b) a plurality of circumferentially spaced recesses provided in said leg at said free axial end thereof; each said recess extending from said radially outer surface to said radially inner surface;
 - (c) an annular sealing body surrounding said leg and being seated thereon; and
 - (d) a plurality of circumferentially spaced, radially inward-oriented extensions forming part of said annular sealing body and projecting into respective said recesses provided in said leg for effecting a form-locking connection between said slide ring and said annular sealing body.
 2. The slide ring seal assembly as defined in claim 1, further wherein at least one of said recesses continues with an axially extending undercut provided in said leg; and further wherein at least one of said radially inward-
